

Forest Products Targeted Solutions

North American Plastic Sales

Servicing:

**UHMW-PE for Wear and Impact areas.
Industrial Laminates for Saw Guides, Bearing Surfaces, And High Temperatures.**

Wood Products Industry

INDUSTRIAL LAMINATES, COMPOSITES, and UHMW-PE for Paper and Saw Mill (parts and components) in bearing, wear, impact and guide applications.

Lamitex® CYB is a cotton fabric impregnated with a graphite modified phenolic resin formulation. Its low coefficient of friction gives CYB exceptional high wear resistance in aggressive and dust-filled environments.

Lamitex® PF-30, an Organic Fiber/Phenolic composite with a graphite filler, was developed as a paper mill wear strip and seal bar material for bearing applications in aggressive chemical and wet environments. Exceptional wear and self-lubricating conditions contributed to its popularity in other bearing applications and especially traditional graphite and molly-filled grade C cotton phenolic applications. PF30 is a preferred material for **saw mill band saw guides, transfer deck wear strips, band saw pressure blocks and wear strips.**

Lamitex® G-10 and G-11 materials are regularly used in vibrating conveyor applications for composite springs, slat springs or vibratory slats.

LAMITEX is a registered trademark of Franklin Fibre-Lamitex Corp.

UHMW-PE for wear and impact applications, including our enhanced formulas for specific problem areas.

Features:

- ◆ Self Lubricating / Low Friction Surface
- ◆ Low to High Impact Protection
- ◆ Load Bearing and Specialty Bearing
- ◆ Chemical Resistant
- ◆ Grades and Blends for temps to 500° F

Benefits:

- ◆ Increased Application Life
- ◆ Highest Wear Resistance on the planet
- ◆ Reduced downtime and Maintenance
- ◆ Fabrication to your drawing or specs

Products:

- ◆ Sheet, Rods, Tubes, Extrusions
- ◆ Most gauges from thin to thick
- ◆ Dielectric Insulating and Isolating
- ◆ Molded Parts to your print or spec
- ◆ Rubber or Urethane backed UHMW
- ◆ Molecular weights to 11,000,000
- ◆ ISO 9001/2000 certified
- ◆ Custom Blends available
